

Start-of-Unit Check-in with Biscuit

A0 quiz formative

A short formative diagnostic given at the start of the unit. Biscuit checks where each learner is with reading numbers, place value, basic facts and simple fractions, so teaching can be pitched correctly. Not graded — used to inform planning. Completed individually on paper, ~20 minutes.

Task

"G'day, friend! Before our big adventure, let's see what you already know. There are no marks here — just have a go, and we'll learn the rest together!"

1. Write this number in words: **3 482**

2. What is the value of the **4** in **3 482**?

3. Work these out:

$26 + 47 =$ _____ $7 \times 6 =$ _____ $80 - 35 =$ _____

4. Circle the **even** numbers: 7 12 25 40 33

5. Biscuit shares 1 gumnut biscuit equally between himself and Pip. Colour in **one half** of the biscuit.

Biscuit says: "All done? Wonderful trying! Leave any you're unsure about — that just tells us what to explore next."
