Naming shapes and spotting right angles

"A right angle is a perfect square corner," says Ollie. "Fold a corner tester to check any angle — if it fits exactly, it's a right angle."

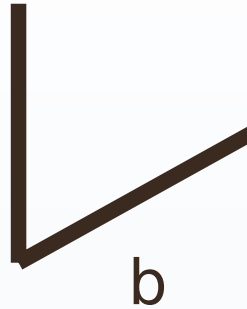

1. Name each shape.

a) _____ b) _____ c) _____

2. Two triangles like this join along their long side. What shape do they make?

3. Tick the corner that is a **right angle** (a square corner).

Which one is the right angle? _____

4. How many right angles (square corners) does a rectangle have? _____

5. Draw a square, then draw a line to split it into two triangles.
