Subtraction by counting on

"Counting up is the friendly way to subtract," says Biscuit. "Take it slow."

1. Count on to find the difference. Follow the example.

$50 - 30$: count from 30 up to 50 = jump of 20.

a) $60 - 40 =$ _____ b) $80 - 50 =$ _____

2. Take away.

a) $90 - 25 =$ _____ b) $100 - 40 =$ _____

3. Bo had 80 gumnuts and gave away 30. How many left? _____

4. Check by adding: if $70 - 20 = 50$, then $50 + 20 =$ _____
