

Make a Bush Clock (Cut & Fasten)

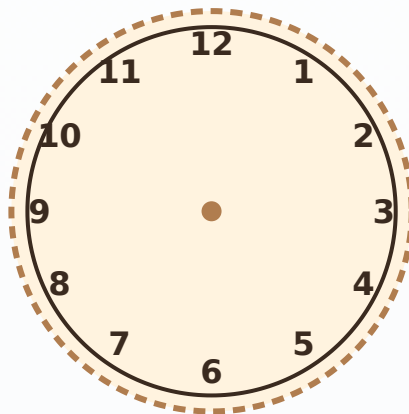

A make-it paper clock for C5 time lessons. Students cut out a clock face and two hands and fasten them with a split-pin to make a working model clock, then use it to show and read times. Includes teacher notes and tasks. Printable.

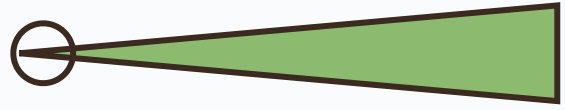

"Make a clock you can turn!" says Ollie. Cut out the clock face and the two hands, then join them through the centre dot with a split-pin so they spin.

For the teacher. Print on card. Children cut out the circle and both hands, then push a split-pin through the hands and the centre dot. Check the short hand (hours) and long hand (minutes) move freely. Use it for "show me" time practice and duration jumps.

Cut out the clock face

Cut out the hands

short hand = HOUR\$ong hand =

Show these times on your clock

1. Show 3 o'clock. 2. Show half past 7. 3. Show quarter past 9.

4. Set your clock to 10:00. Move the minute hand on 45 minutes. What time is it now?

5. Partner game: one person shows a time, the other reads it aloud and writes it.

"Turn the hands and watch time go round. Well done!" — Ollie
