

Q3. Design a solution. A school field on a slope is losing its topsoil every time it rains heavily. Design a way to reduce the erosion. Explain how your idea works, using the words **erosion** and **topsoil**.

Q4. Uluru has stood for hundreds of millions of years while softer rock around it wore away. Explain why **some** rock weathers and erodes faster than other rock.

[illegible]

Q5. Big thinking. Aboriginal peoples have cared for Country for tens of thousands of years, including managing land and water. Suggest one way that caring for the land (for example, keeping plants growing) also helps *slow down* weathering and erosion.

Great Earth scientists think across **huge spans of time** — from a single storm to hundreds of millions of years.
