

Earthquakes and Volcanoes

Sudden changes from below

The Earth's surface can change suddenly when the crust moves. Show what you know about earthquakes and volcanoes.

Q1. Draw and label a volcano. Label: the opening, the melted rock, and the ash and gas.

Q2. Explain what causes an earthquake.

Q3. Describe one way each event changes the Earth's surface.

Event	How it changes the surface
Earthquake	
Volcanic eruption	

Q4. A **geological event** is sudden. How is it different from slow change by **erosion**?
